

WELL

READY-TO-USE WATER TREATMENT
FOR THE PROFESSIONAL WELL DRILLER

In a nutshell

More added value for your customer

A higher turnover and profit for you

An easy way to obtain treated and usable water

A ready to use solution

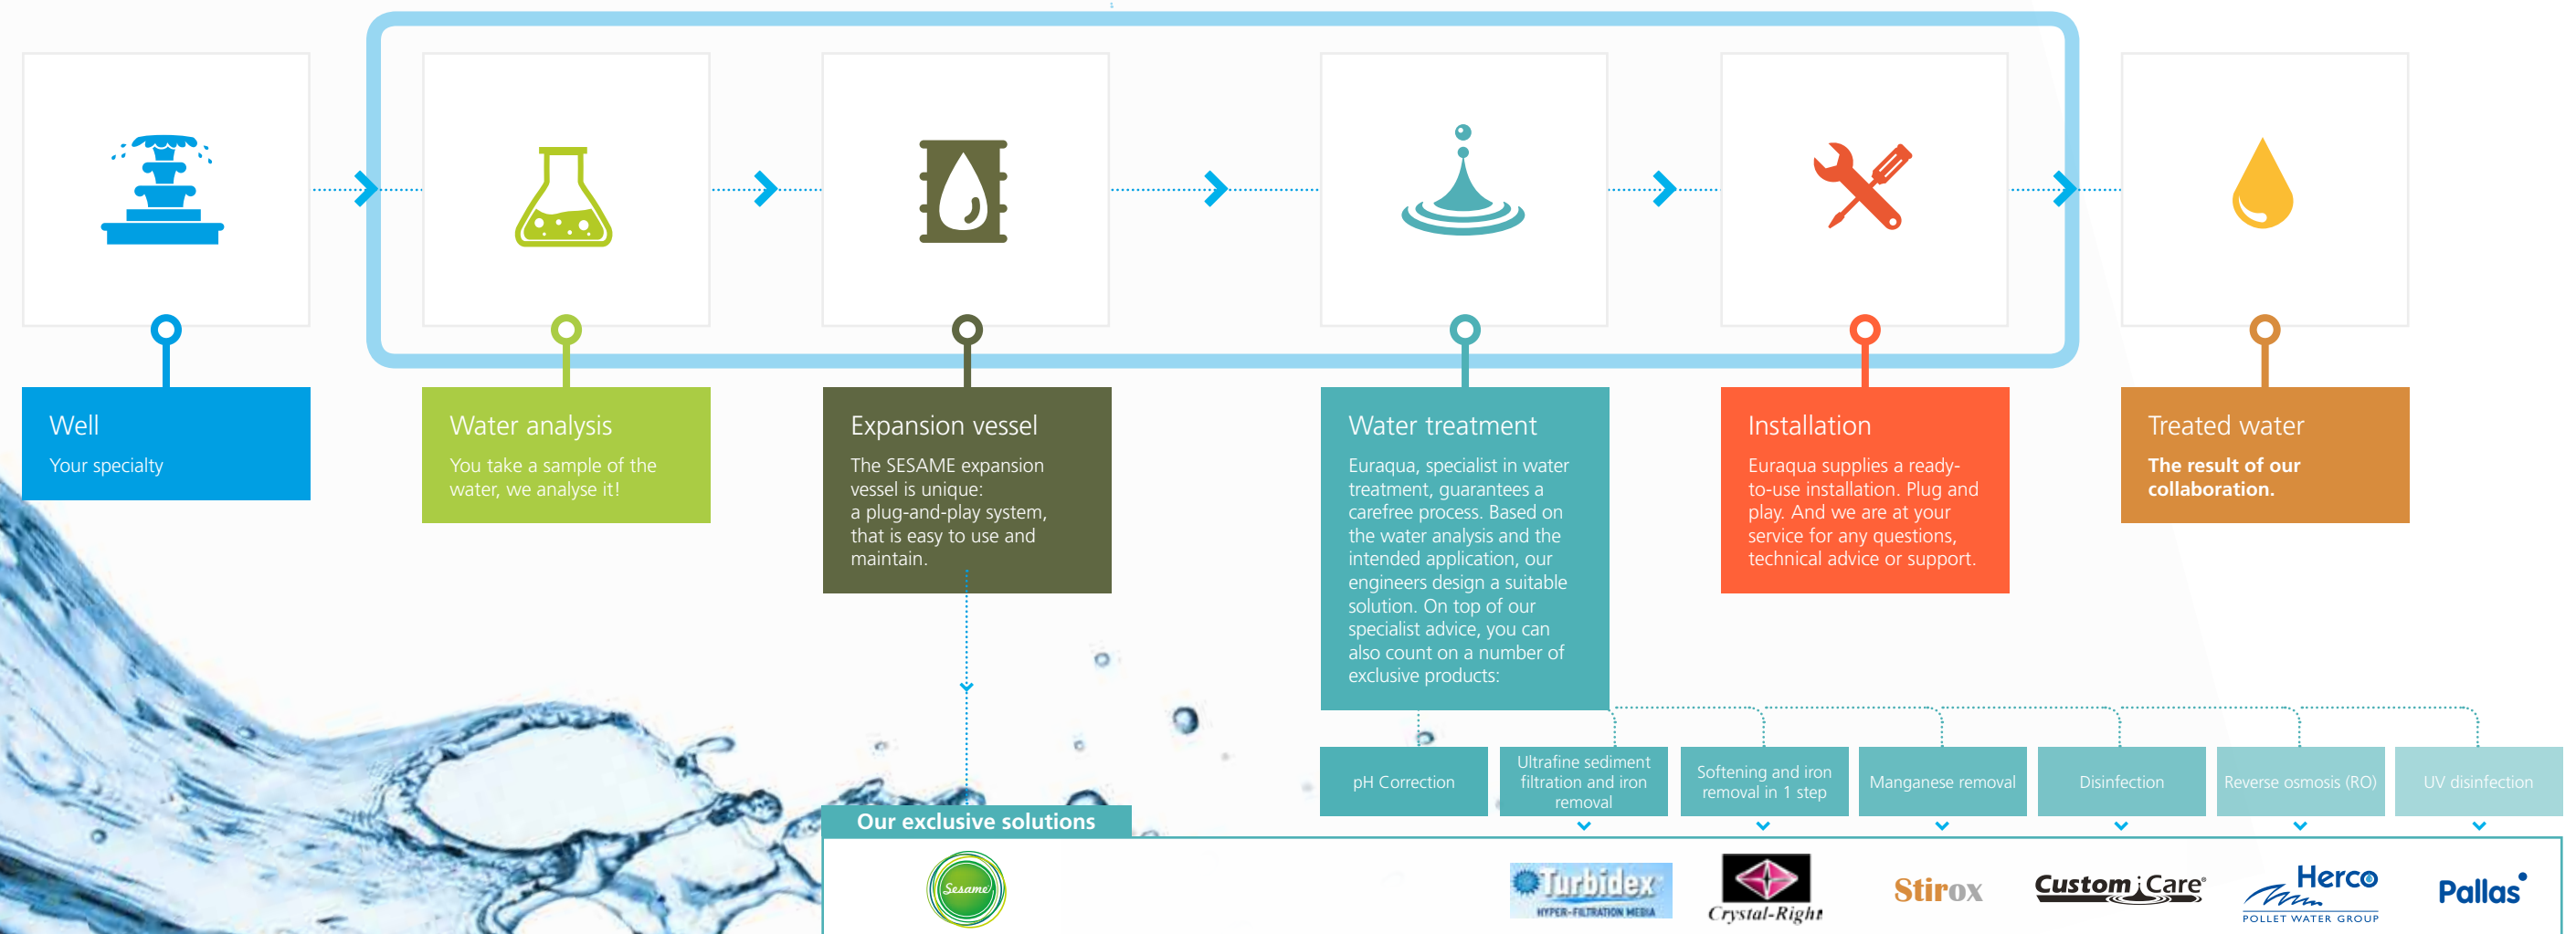

Simple installation thanks to the plug-and-play system

WELL, THE POWER OF SIMPLICITY! FROM WELL TO TREATED WATER.

Well water has more to offer than you think

Did you think that the world of softening, disinfecting and filtering was more complex? Nothing is further from the truth. With the WELL-programme, Euraqua created a ready-to-use solution, tailored to the well driller.

WELL aims to bring together the worlds of well drilling and water treatment. For nearly 40 years, Euraqua has been thinking 'water'. We know better than anyone how to help you set up a complementary activity in a simple but reliable way. WELL helps you transform well water into the usable water that the customer expects from you, in just a few simple steps. And for each of those steps, you can count on Euraqua's experience and know-how.

WELL, THE POWER OF SIMPLICITY!
FROM WELL TO TREATED WATER.
