PALLAS BLUE WATER FILTER

Fresh & good tasting tap water

Pallas Water Filter Range

The Pallas water filter cartridges are a unique range to improve the taste, odor, filtration or concentration of sediments in your water. Each color represents a different kind of treatment. With a simple installation, you just add the cartridge that suits your needs.

WHY TAP WATER

First of all, drinking tap water is a very simple way to reduce your ecological footprint and take care of our planet. By installing 1 filter at home you can replace up to 10 000 plastic bottles. Because tap water is delivered directly to your home, you no longer have to lug around bottled water and garbage bags. And last but not least, tap water is good for your wallet.

FRESH AND GOOD TASTE

Pallas Water Filter Cartridges assure high-quality, fresh and good tasting drinking water.

They remove polluting elements, odors and off-tastes from your tap water, but preserve natural minerals. In this way, the filters turn your tap water into a natural source of drinking water.

CONVENIENCE

With a simple installation, you connect the filter to the existing water pipe so no additional faucet is needed. The filter requires limited maintenance, as it only needs to be replaced once a year. Enjoy 100% fresh and good tasting water, straight from your own tap.

ADVANTAGES

1

REMOVES ODORS & OFF-TASTES

The Pallas BLUE filter removes unpleasant odors and off-tastes to turn your tap water into a natural source of drinking water. In addition, by using filtered water, you will enjoy the full flavor and aroma of coffee, tea and other drinks based on water even more.

2

ECO-FRIENDLY

The Pallas BLUE filter is an ecological and convenient alternative to bottled water. By installing the filter at home, you help eliminate up to thousands of plastic bottles that are transported through our streets every day, which in turn reduces greenhouse gas emissions.

3

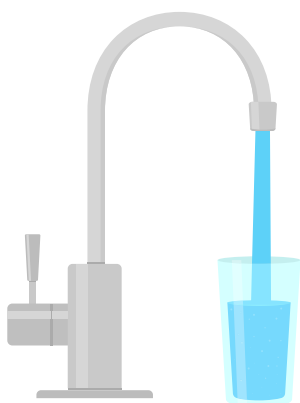

GREAT PERFORMANCE

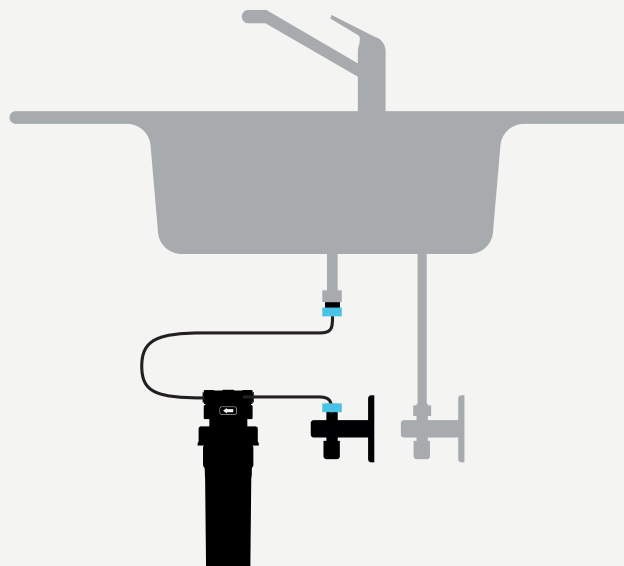

The attractive and elegant design of the Pallas BLUE filter goes hand in hand with its great performance. When you install the filter, there is limited pressure loss. In addition, the good flow rate of your tap water is maintained.

4

USER-FRIENDLY

With the Pallas BLUE filter, you get fresh and clean water straight from your tap. The filter can be installed on your existing kitchen faucet. It needs to be replaced only once a year. Difficult? Not at all. You can change the filter in no time. On top of that, you don't have to lug around bottled water anymore and you save money.

FEATURES & SPECIFICATIONS

CARTRIDGE FEATURES

The Pallas BLUE filter is a cartridge with an activated carbon block filter used for dechlorination and purification of drinking water. The filtration reduces and removes chlorine content, organic compounds, odors and off-tastes from your tap water. The unique feature of the Pallas BLUE filter is providing clear drinking water at home by reducing water turbidity. The filter should be replaced at least once a year, depending on its capacity.

- Improves the taste and odor of your water
- Dechlorination and purification of drinking water
- Reduces water turbidity
- 5 micron filter
