

IGLU

WATER SOFTENERS

ADVANCED, INTELLIGENT, PERFORMANCE

High flow for the most demanding applications

Superior resin and regeneration for the best efficiency

WiFi enabled for data analysis and troubleshooting

AN IGLU WATER SOFTENER IS...

Fitting a domestic water softener will reduce scale or hardness giving you all the benefits of soft water. Scale builds up in pipes, boilers, washing machines and dishwashers. Fitting a water softener reduces this scale, saving money.

A water softener will also lengthen the life of equipment, reduce scale deposits around showers and taps, make laundry feel softer and reduce the use of detergents and other chemicals.

From the day you install this water softener it will reverse the scale build up from the last 20 years, removing old scale build up.

Made in the UK, WRAS approved valve, low power consumption, ultra reliable controller.

Benefits

- Save money on energy bills
- Eliminate expensive maintenance bills
- Remove traces of scale in the shower, bath or sink
- Give your skin a silky clean feeling
- Make your laundry feel softer and look brighter
- Reduce the high cost of soap and detergents

Features
