

DELTA

E S C A L D A

NON - ELECTRIC
WATER SOFTENERS

Simple and straight forward installation - Connect to the cold water supply, turn the dial to the correct hardness and go. No need for an electrical supply.

Environmentally Friendly Advanced Technology - makes Delta water softeners one of the most efficient (environmentally friendly) water softeners on the market.

Energy Saving - Saves money on energy bills by stopping scale build up in the heating system.

Low Carbon Footprint - Doesn't use electricity, only uses 330g of salt and 18 litres of water for a regeneration.

On demand - Uses patented water powered meter to only regenerate when necessary.

WHY DO YOU NEED SOFTENED WATER?

The Delta is a modern, stylish, compact non-electric water softener. It is simple to use with a practical design ideal for installation under the sink.

WHY?

Calcium and magnesium minerals in water cause scale to form in your kettle, on your shower head and in your heating system. This 'furring up' looks unsightly, reduces the life of the appliances, and makes soap difficult to lather up. Just 1.6mm of scale build up in a heating system can reduce efficiency by 12%, adding hundreds of pounds to a fuel bill. A Delta water softener removes the calcium and magnesium from the water stopping this scale build up, saving you money.

Softened water also gives your hair that nice silky sensation and your laundry that soft luxurious feeling. Combine this with the reduced use of chemicals and detergents makes Delta the obvious choice.

Features and Benefits

- Non Electrical
- Compact
- Automatic Control
- Low Salt and Water Consumption
- Simple Installation

Technical Data

Width	241mm
Height	483mm
Depth	538mm
Connection 3/4 inch	BSP
Working Pressure	1 - 6 Bar
Flow Rate	25 Litres/min
Pressure Drop	1 Bar
Capacity (300ppm CaCO3 hardness)	500 Litres
Water Usage/Regeneration	18 Litres
Salt Usage/Regeneration	0.3 - 0.4kg
Maximum Temperature	50°C
